**Operation**

**Setting the clock**

1. Press twice on the timer button. *The hours flash in the display.*
2. Turn the control dial to set the hours. *The set hours appear in the display.*
3. Press the timer button again. *The minutes flash in the display.*
4. Turn the control dial to set the minutes. *The set minutes appear in the display.*
5. Press the timer button again. *The clock is set: the current time appears in the display with a flashing ':'.*

**Note**

When the appliance is plugged in for the first time, the display shows "0:00". First set the clock.

**Using the microwave**

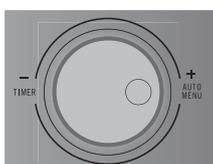

1. Press the microwave button to select the microwave function. *P100 appears in the display. The maximum power (900W) is selected. If you wish to select a lower power, press the function button again.*

Power output	Press function button	In display
100% / 900 W	1x	P100
80% / 800 W	2x	P80
50% / 500 W	3x	P50
30% / 300 W	4x	P30
10% / 100 W	5x	P10

2. You can also turn the control dial to select a different power.
3. Press the start button. *The selected power is now confirmed.*
4. Turn the control dial to set the time. *The display indicates the set time.*
5. Press the start button again. *The microwave switches on and the set time counts down in the display. The microwave symbol flashes in the display.*
  - ▷ When the set time has been reached, the current time appears again in the display, and you will hear audio signals.

**Please note! Not all materials can be used in the combi microwave. Only use suitable cookware.**

**Fast cooking**

1. Press the start button. *You will now cook at 100% microwave power for 30 seconds.*
2. Every next activation of the start button will extend the cooking process by 30 seconds.  
*The maximum cooking time is 95 minutes.*

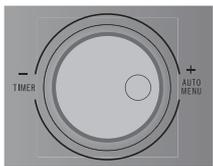

You can also first turn the control dial to the left to set a time. Then press the start button and the microwave will switch on on full power for the set amount of time.

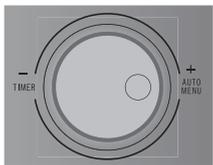

**Using the grill**

1. Press the combi button once.  
*'G-1' appears in the display.*
  - Press again (a number of times) on the combi button if you wish to select a different function.
  - You can use the control dial to select another function by turning the dial.
2. Press the start button.  
*The selected function is now confirmed.*
3. Turn the control dial to set the time. *The display indicates the set time.*
4. Press the start button again. *The microwave switches on and the set time counts down in the display.*  
*The grill symbol flashes in the display.*
  - Half-way through the grill time a double-beep signal sounds to indicate that the dish needs to be turned over. Open the door, turn the dish over, close the door and press the start button.
  - When the set time has been reached, the current time appears again in the display, and you will hear 5 beeps.

**Hot air cooking**

1. Press the oven button. *'140' flashes in the display.*
2. Press again (a number of times) on the oven button if you wish to set a different temperature.  
*You can set a temperature from 140 °C to 230 °C.*
  - You can use the control dial to select temperature by turning the dial.
3. Press the start button. *The selected temperature is now confirmed.*
4. Turn the control dial to set the time (maximum 95 minutes).  
*The display indicates the set time.*
  - The time can only be set once the pre-heat is ready and the door has been opened and closed again.
  - If no time is set within 5 minutes after pre-heating, the pre-heating stops and 5 beeps sound.  
*The microwave switches off.*
5. Press the start button again.  
*The microwave switches on and the set time counts down in the display.*  
*The oven symbol flashes in the display.*
  - When the set time has been reached, the current time appears again in the display, and you will hear 5 beeps.

**Child lock**

With the child lock you can lock the control panel to prevent unintended use of the oven.

**activating the child lock**

1. Press the stop button for 3 seconds.  
*You hear a beep. The 'lock' symbol appears in the display.*

**deactivating the child lock**

1. Press the stop button for 3 seconds.  
*You hear a beep. The 'lock' symbol disappears from the display.*

**See the full manual for additional user information about use, maintenance and breakdowns.**
